

# MDA Server Administration Guide

## About MDA

MDA is an abbreviation for *Mobile Data Acquisition*, is a software product from ITEG IT-Engineers GmbH ([www.iteg.at](http://www.iteg.at)).

It allows to take mobile devices on „measurements rounds“ to record several types of measurements in an easy way. While on tour, the device does not need a continuous network connection, therefore enabling the recording of data in any environment suitable for the IP Code rating of the device.

## Purpose of this guide

This administration guide briefly describes the installation and maintenance of an MDA server.

The reader should be familiar with the operating system in use and TCP/IP networking.
